Security Enhancement Allows Up To Four Base Stations

Tallahassee, Fla. – May, 2007 – GTO has introduced an expanded and improved Residential Wireless Entry Intercom/Keypad (F3100MBC) that will work with every brand of gate operator available.

The new version accepts up to four base stations and has crystal clear two-way communication up to 500 feet wireless and up to 1,000 feet with a remote mount antenna for enhanced range.

With the GTO Intercom/Keypad visitors and solicitors can be screened by inside the home. Access to property can be accepted or denied with the touch of a button. The stand alone keypad allow up to 25 entry codes for added security.

For convenience, the interior intercom is mobile and can be used anywhere in a home just like a cordless phone. The exterior Intercom/Keypad can be powered with four “AA” batteries or the gate operator’s 12 volt DC power source.

“This second generation of our revolutionary Wireless Entry Intercom/Keypad is another example of GTO’s ongoing commitment to research and development,” said Kevin Peaden, vice president of sales for GTO. “It’s also an example of our commitment to our dealers who give us the feedback that sparks the development of new and upgraded gate operators and accessories.”

Other features of the GTO Residential Wireless Enter Intercom/Keypad include:

- State-of-the-art 900 Megahertz technology commonly used in today’s cordless phones to provide crystal clear two-way communication up to 500 feet wireless or 1,000 feet wired.
- The Keypad portion utilizes the same 318 MHz frequency common with all GTO receivers and transmitters.

The system can be installed without the cost and labor involved in trenching telephone and power wires between the gate and the house. And with the “Grant Access” safety feature, the homeowner controls the keypad’s ability to open the gate. If the homeowner presses the “Grant Access” button on the base unit in response to a caller at the entrance, it allows the caller, who has a full view of the gate, to press a keypad button allowing access to the property.

GTO gate operators and accessories can be found through dealers across the United States and around the world. For a dealer near you or more information about GTO, go to www.gtoinc.com or call GTO, Inc at (800) 543-GATE.

About GTO: Celebrating 20 YEARS of Innovation

Founded in 1987, GTO, Inc. is an American manufacturer and leading provider of turnkey access control system solutions for residential, commercial and industrial applications.
