

**GTO, INC UNVEILS NEW COMMERCIAL OPERATORS FOR CONTINUOUS DUTY APPLICATIONS WITH BUILT IN BATTERY BACKUP THE GTO/PRO GP-SW100 & GP-SL100 AC SWING & SLIDE GATE OPERATORS.**

**Company Applies the Latest Innovations and Design Through Research & Development to it's AC Operators As It Has With Its Widely Known GTO/PRO DC Series**

**Tallahassee, Fla. – September, 2007** – After more than 20 years establishing itself as the leader in DC swing gate operators, GTO, Inc. has turned its attention to the AC powered commercial pad mounted, continuous duty, battery back up swing and slide gates operators.

The GTO/PRO GP-SW100, for swing gates, and GTO/PRO GP-SL100 for slide gates, incorporate the most up-to-date technology available. Both operators are AC powered, and include maintenance-free brushless DC motors for years of trouble-free operation.

Both operators also include a built in battery back up system for uninterrupted operation, at no added cost.

“GTO’s research and development team has focused on these first-to-market AC continuous duty pad mount operators that offer innovative design and features. Today’s market is being served by outdated design operators that require expensive add on battery back up systems,” said Kevin Peaden, GTO/PRO vice president of sales. “These operators are designed with superior components that will deliver the most reliable best-quality operators available today. This all comes with the cost savings of a built-in battery back up, which is required on most applications today. These new AC operators are fully supported by GTO’s solid reputation as a leading innovator in the Professional Access Control Industry as demonstrated by our GTO/PRO DC line of products.”

GTO/PRO GP-SW100 and GTO/PRO GP-SL100 commercial-duty operators are designed for commercial applications and are a great compliment to residential and estate sites.

The GP-SW100 will operate swing gates up to 20-feet long and up to 1,200 pounds, while the GP-SL100 will operate slide gates up to 37-feet long and 1,200 pounds. Both come with a GTO Commercial 5/7 Year Warranty.

The operators both include continuous duty operation and all DC powered access controls and safety devices. On board the 12 volt DC power delivers 300 Amp UPS and 2,500 RPM, 24-volt maintenance free brushless DC motors with the equivalent of a 1/2 horsepower AC motor.

Optional accessories for these AC operators includes GTO's **plug-in ready loop** detectors, driveway vehicle sensor, safety photo beams, Estate Wireless Intercom with integrated keypad, universal receivers, automatic gate locks, keychain transmitters and digital keypads.

GTO/PRO gate operators and accessories can be found through dealers across the United States and around the world. For a dealer near you or more information about GTO/PRO, go to [www.gtopro.com](http://www.gtopro.com) or call GTO, Inc at (800) 543-GATE.

### **About GTO: Celebrating 20 YEARS of Innovation**

Founded in 1987, GTO, Inc. is a leading American provider of turnkey access control system solutions for residential, commercial and industrial applications. GTO distributes Mighty Mule automatic gate operators and accessories for single and dual chain link, farm tube, panel, vinyl, aluminum, wood and ornamental wrought iron fence gates to the do-it-yourself handyman throughout the world. GTO/PRO automatic gate operators, made for every type of application, work in rural, urban, commercial and industrial environments. For more information on GTO/PRO products or dealer information, see [www.gtoinc.com](http://www.gtoinc.com) or call GTO, Inc. at (800) 543-GATE.

**Editor's note:** high quality photos of the GTO automatic swing gate openers are available.
